PROJECTS:

Multipurpose IoT Based Health Monitoring System

2022, College Thesis

Role: Hardware QA tester & Front-end developer

It is an IoT (Internet of Things) based machine with multiple functionality; it can measure one's body temperature, pulse rate and it has an automatic alcohol dispenser. It has an ESP 32 Camera inside with accurate time stamping for security purposes. It can send the data or the readings to the user's application via Bluetooth and QR code and submit it to the database via application with the help of internet.
